PROFILE

I am an accomplished Full Stack Developer with strong expertise in both backend and frontend development. My backend skills include architecting robust server-side solutions, focusing on data security, scalability, high performance, and clean code, particularly in Node.js and database management. On the front end, I excel in creating engaging user interfaces using HTML5, CSS3, JavaScript, and modern frameworks like React and Next.js.

I have proficiency in DevOps practices and a proven track record of leadership, successfully managing cross-functional teams and delivering outstanding web applications. My commitment to innovation drives me to achieve top-notch results in every project.

In addition to my professional experience, I am a proactive self-learner with proficiency in Java, Spring Boot, and React Native. These self-acquired skills complement my technical repertoire and allow me to adapt swiftly to evolving technologies.

EDUCATION

Bachelor of Software Engineering
Damascus University

2022
Damascus, Syria

PROFESSIONAL EXPERIENCE

Full stack developer

Onpassive

01/2024 – present
Dubai, UAE

- Full Stack Development: Engineered the backend and frontend infrastructure for the web conferencing app (O-Connect), leveraging Node.js for server-side functionality and React.js for an interactive user interface.
- Real-Time Communication: Implemented WebRTC and Socket.io to enable seamless real-time communication, enhancing user engagement and experience.
- GraphQL Integration: Designed and integrated GraphQL APIs to facilitate efficient data querying, improving performance and reducing payload size for client applications.

Full stack developer

Step By Tech

08/2022 – 01/2024
Dubai, UAE

- Backend Development: Developed the backend infrastructure for the Content Management System (CMS) and Content Server (CS) of the Vidnik App using Nodejs and Nestjs
- Frontend Development: Designed and implemented the frontend user interfaces for the CMS and CS of the Vidnik App using Reactjs
- Quality Assurance: Assumed responsibility for Quality Assurance processes, ensuring high performance and reliability of the Vidnik App using Jestjs
- Website Development: Spearheaded the development of the Step By Tech Website and Mark Media, contributing to a seamless online presence, using React and Nextjs
- DevOps Management: Orchestrated DevOps tasks, including deployment, Nginx configuration, AWS infrastructure management, and Docker containerization, to streamline development workflows.

Full stack developer

Darsoft

01/2020 – 07/2022
Damascus, Syria

- Led Development Projects: Spearheaded the backend and frontend development for the Sky Education App, I Tabib App, and Gloss And Glow App, enhancing user experiences and functionality across multiple applications, using Nodejs and Nestjs

- **Team Leadership:** Assumed the role of Team Leader for creating the Tolerance Real Estate Website, ensuring successful project completion and effective team coordination.
- **Website Development:** Led the development of the Darsoft website, significantly contributing to the company's online presence and branding, using React and Nextjs
- **DevOps Management:** Managed DevOps tasks, including AWS infrastructure setup and management, Nginx configuration, EC2 instances, and S3 storage, optimizing deployment and scalability across projects.

PROJECTS

Personal Portfolio

- Developed a personal portfolio website to showcase projects and professional experience using React and Nextjs
- Created a responsive and visually appealing design to highlight skills and achievements using Tailwind CSS
- Integrated interactive components and animations to enhance user engagement using Farmar Motion
- apply multi theme (light and dark)

Guessing the number

- I created a dynamic "Guessing the Number Game" using NestJs and ReactJs, with MongoDB as the backend database.
- Leveraging React Redux, WebSocket, and REST API, I developed an engaging gambling experience.
- Comprehensive API documentation using Swagger ensures accessibility and future enhancements.

Cars shop server

- I orchestrated the development of a Spring Boot-based Car Shop Server, implementing robust Authentication and Authorization with JWT.
- The server facilitates asynchronous communication through Message Queues for efficient data handling.
- Furthermore, I integrated a caching mechanism to optimize performance.
- This project highlights my proficiency in Full Stack Development and underscores my commitment to delivering secure, efficient, and feature-rich solutions.

Secure Server Implementation

- Developed a server using Java and Asymmetric encryption (RSA)
- Implemented secure communication channels using public and private key pairs to ensure data confidentiality and integrity.

Chat Application

- Developed a client-server chat application using Java, and JavaFX.
- Implemented real-time messaging between clients using Socket.io.
- Designed an intuitive user interface with JavaFX to enhance user experience.

SKILLS

Program Languages: Javascript, Typescript, Java, and Python.

FrontEnd: HTML, CSS, React JS, Next JS, Material UI, Responsive, Tailwind CSS, React Redux, Redux Toolkit, Apex Charts, and Farmer Motion.

Backend: OOP, RestAPI, Websocket, Socket IO, WebRTC, Node Js, Nest Js, Express Js, Spring Boot, Mongoose, Sequelize, Swagger UI, PayPal Payment, Stripe, Strapi CMS, Redis, Caching, RabbitMQ, and Microservice.

Coding: clean architecture, lambda expression, SOLID Principles.

Databases: MongoDB, My SQL, and PostgreSQL.

DevOps: Git, Github, Gitlab, Nginx, AWS, EC2, S3, Load Balance, Docker, Kafka.

General Skills: Problem Solving, Self Learning, and Organized.

Languages: Arabic and English
